

Permit Application Instructions

- 1. **Permit Application Process:** Applicants proposing to discharge to the wastewater collection system shall complete and file with CMSA the following Wastewater Discharge Permit Application (Application) at least 30 days in advance of commencement of the proposed discharge. The permit fee must accompany all Applications. The Application shall include any applicable details and supporting documents and attachments required below.
- 2. Permit Processing: Permit applications require approximately 30 days for processing. The applicant will be informed upon completion of the draft permit in writing. The applicant will be given 30 days to review the draft permit and respond in writing. After 30 days, if CMSA has received no written response, or upon the permittee's approval prior to the end of the 30-day review period, the permit will be considered final. CMSA will issue the final permit to the applicant on or before the effective date of the permit. An initial site inspection may be required by CMSA prior to permit issuance and commencement of discharge.
- 3. **Permit Fee:** A check for the appropriate permit fee, made out to Central Marin Sanitation Agency, must accompany the Application. Permit fees are specified in the CMSA Fee Ordinance (Ordinance No. 2019 1).
- 4. **Permit Term:** Class III Discharge Permits will be issued for a period of 3 years. An industrial user with an expiring permit shall complete and file with CMSA a renewal Application along with payment of the appropriate fee no later than 30 days prior to the expiration of the industrial user's existing permit.
- 5. **Permit Monitoring:** CMSA may require a monitoring and reporting program. Modifications to this program may occur at any time during the permit's effective duration. Monitoring (sampling and inspections) may also be performed by CMSA personnel. It is the responsibility of the permittee to provide adequate information in this application, and subsequently, to enable CMSA personnel to obtain representative samples of discharges as needed. The permittee will be invoiced for CMSA's monitoring costs. The cost of each sample is based upon the laboratory analyses performed.
- 6. The applicant will be required to abide by all provisions of the respective Sewer Use Codes applicable to the participating Member Agency in which the discharge occurs, i.e., the Central Marin Sanitation Agency, Ross Valley Sanitary District, San Rafael Sanitary District, Sanitary District #2 and Las Gallinas Valley Sanitary District.

Section I: Contact Information

Company Information

Section II: General Facility Information

Facility Name/Building Number:
Enter the SIC Code for the facility:
List the principal business activities/products/services occurring at the facility:
Is process wastewater discharged from this facility? \Box Yes \Box No If no, skip to Section X.

Complete the table below for all wastewater generating activities occurring at the facility (attach additional sheets if necessary):

		Neekday	s	\	Veekend	SIC	
Wastewater Source	Days	Start Time	End Time	Days	Start Time	End Time	SIC Code
Example – Sanitary Discharge	M-F	8:00a	5:00p	S-S	9:00a	4:30p	N/A

Complete the table below with information that represents typical operations:

	Office En	nployees	Process Related Employees					
			Day Shift Swing Shift		Night Shift			
	Number	Hours	Number	Hours	Number	Hours	Number	Hours
Mon – Fri								
Saturday								
Sunday								
Example	2	9a – 5p	10	7a – 3p	8	3p – 11p	6	11p – 7a

Section III: Environmental Control Permits

List all regulatory permits held by the facility:

Permitting Agency	Permit Type	Permit Number		
Example – U.S. EPA	Hazardous Waste Generator	12345		

Section IV: Description of Facility ActivitiesCheck each of the following that are either present or occurring at the facility:

Check each of the following tha	it are either present or occurring at tr	ie raciiity:				
☐Autobody and Paint	☐Metal Fabrication	☐Silk Screening				
□Coin Operated Carwash	☐Plastic Molding	☐Solvent Degreasing				
□Detailing	□Painting	☐Steam Cleaning				
☐Engine Degreasing	☐Paint Stripping	☐Tire Shop				
☐Engine Maintenance	□Polishing	☐Transmission Maintenance				
□Equipment Rental Yard	☐Pressure Washing	□Vehicle Maintenance				
☐Gas Station Carwash	☐Radiator Repair	☐Wet Sanding				
□Grinding	☐Recirculating Hot Water	□Other:				
☐Machine Shop/Machining	System					
Percentage of process wastewa	ater discharged in batches:	%				
Percentage of process wastewa	ater discharged continuously:	%				
Is the discharge of process was	tewater subject to seasonal variation	s? □Yes □No				
If the process wastewater is sul	bject to seasonal variation, provide a	description below:				
Are any operational or process three years? \square Yes \square No	changes or expansions/contractions	currently planned during the next				
If yes, describe the planned cha additional sheets if necessary):	anges below and indicate the estimate	ed effective date(s) for each (attach				

Section V: Water Usage and Wastewater Discharge Information

Complete the following using the facility's past six month's data (or best estimates if six months of data is not available). If any values are estimated, provide a detailed description of the calculations used. Enter all flow data in gallons and/or gallons per day.

Time period used to complete Section V:	-
Average daily water usage for the facility: (This information can typically be obtained from the facility's water utility bills. If the facility has separate meters for irrigation, DO NOT include the flow from those meters in this section.)	gallons per day
Facility Water Source: ☐Municipal ☐Recycled ☐Groundwater	
Does the facility have separate water meters for irrigation? \Box Yes \Box No If No, enter the average daily water usage for irrigation:	gallons per day
Daily evaporation from cooling towers or other sources:	gallons per day
Average daily wastewater discharge from the facility: (Average daily water usage minus irrigation minus evaporation.)	gallons per day

Wastewater discharge breakdown by type:

		Daily flow (gpd)							
Process	Batch Discharge	Batches per day	Batch Vol (gallons)	Average	Maximum	Measured	Estimated	Discharge Location	
	□Yes □No								
	□Yes □No								
	□Yes □No								
	□Yes □No								
	□Yes □No								
	□Yes □No								
	□Yes □No								
	□Yes □No								
	□Yes □No								
Example – Batch	⊠Yes □No	3	150				\boxtimes	Batch tank	
Example – Continuous	□Yes ⊠No			450	600	\boxtimes		Process waste	

Section VI: Pollution Abatement

Check each of the following that ar	e used to treat wastewater at the f	acility:
□Adsorption	□Equalization	□Ion exchange
☐Air flotation	□Evaporation	☐Oil/grease separation
□Chrome reduction	☐Filter press	□pH adjustment
□Clarification	☐Filtration – membrane	□Precipitation
□Cyanide destruction	☐Filtration – simple	☐Reverse osmosis
□Distillation	☐Filtration – other	☐Settling/clarification
□Disinfection	□Flocculation	
∃Electrowinning	☐Gold recovery	
ist all regulatory permits for each Permitting Agency	process checked above: Permit Type	Permit Number
Example – County Dept. of Health	Cyanide Destruction	12345
	ekdays from to Wednesday □Thursday □Fri	
Pretreatment systems operate wee	ekends from to	on the following days:
□Saturday □Sunday		
Describe the maintenance proce necessary):	dures for each pretreatment sy	stem (attach additional sheets if

For each pretreatment system attach the following:

- Operations and maintenance manual
- Pretreatment system block flow diagram
- Standard operating procedures (SOP) and standard maintenance procedures (SMP) manuals including procedures for handling accidental or slug discharges and pretreatment system upsets, failures, or bypasses.

Section VII: Toxic Organic Management Plan Information

Indicate whether any of the following pollutants are present at the facility. Facilities which use, store, or generate toxic organics must submit a Toxic Organic Management Plan (TOMP) prepared in accordance with CMSA guidelines.

Volatiles		
□Acrolein	\Box 2-Chloroethyl vinyl ether (mixed)	☐ Methyl bromide
□Acrylonitrile	☐ Chloroform	(bromomethane)
□Benzene	(trichloromethane)	\square Bromoform
☐ Carbon tetrachloride	\square 1,1-Dichloroethylene	(tribromomethane)
(tetrachloromethane)	\square 1,2-Trans-dichloroethylene	\square Dichlorobromomethane
□Chlorobenzene	\Box 1,2-Dichloropropane	\square Chlorodibromomethane
\square 1,2,-Dichloroethane	\Box 1,3-Dichloropropylene	□Pyrene
\square 1,1,1-Trichloroethane	(1,3-dichloropropene)	□Tetrachloroethylene
\square 1,1-Dichloroethane	☐ Ethylbenzene	□Toluene
\square 1,1,2-Trichloroethane	☐ Methylene chloride	☐Trichloroethylene
\square 1,1,2,2-Tetrachloroethane	(dichloromethane)	☐ Vinyl chloride
☐ Chloroethane	☐ Methyl chloride (chloromethane)	(chloroethylene)
Semi-Volatiles		
□Acenaphthene	☐Hexachlorobutadiene	☐1,2-Benzanthracene
□Benzidine	Hexachlorocyclopentadiene	(benzo(a)anthracene)
\square 1,2,4-Trichlorobenzene	☐Isophorone	☐Benzo(a)pyrene
□Hexachlorobenzene	□Naphthalene	(3,4-benzopyrene)
Hexachloroethane	□Nitrobenzene	☐ 3,4-Benzofluoranthene
☐Bis (2-chloroethyl) ether	☐2-Nitrophenol	(benzo(b)fluoranthene)
\square 2-Chloronaphthalene	☐4-Nitrophenol	□11,12-Benzofluoranthene
\square 2,4,6-Trichlorophenol	\square 2,4-Dinitrophenol	(benzo(k)fluoranthene)
☐ Parachlorometa cresol	☐4,6-Dinitro-o-cresol	□Chrysene
(4-chloro-3-methyl phenol)	(2-methyl-4,6-dinitrophenol)	☐Acenaphthylene
☐2-Chlorophenol	☐ N-nitrosodimethylamine	□Anthracene
☐ 3,3-Dichlorobenzidine	☐ N-nitrosodiphenylamine	□1,12-Benzoperylene
☐ 2,4-Dichlorophenol	☐ N-nitrosodi-n-propylamine	(benzo(ghi)perylene)
\square 2,4-Dimethylphenol	☐ Pentachlorophenol	□Fluorene
☐ 2,4-Dinitrotoluene	□Phenol	☐ Phenanthrene
☐ 2,6-Dinitrotoluene	\square Bis (2-ethylhexyl) phthalate	□1,2,5,6-Dibenzanthracene
\square 1,2-Diphenylhydrazine	☐Butyl benzyl phthalate	(dibenzo(a,h)anthracene)
☐ Fluoranthene	☐ Di-n-butyl phthalate	☐1,2-Dichlorobenzene
☐4-Chlorophenyl phenyl ether	\square Di-n-octyl phthalate	☐ 1,3-Dichlorobenzene
☐4-Bromophenyl phenyl ether	☐ Diethyl phthalate	☐ 1,4-Dichlorobenzene
☐Bis (2-chloroisopropyl) ether	☐Dimethyl phthalate	☐ Indeno(1,2,3-cd) pyrene
☐ Bis (2-chloroethoxy) methane		(2,3-o-phenlene pyrene)
Pesticides and PCBs		
□Aldrin	☐ Endosulfan sulfate	☐ PCB-1254 (Arochlor 1254)
□Dieldrin	□Endrin	☐ PCB-1221 (Arochlor 1221)
□Chlordane	☐ Endrin aldehyde	☐ PCB-1232 (Arochlor 1232)
(technical mixture and metabolites)	☐Heptachlor	☐ PCB-1248 (Arochlor 1248)
□4,4-DDT	☐ Heptachlor epoxide	☐ PCB-1260 (Arochlor 1260)
□4,4-DDE	(BHC-hexachloro-cyclohexane)	☐ PCB-1016 (Arochlor 1016)
(p,p-DDX)	☐ Alpha-BHC	□Toxaphene
□4,4-DDD	☐ Beta-BHC	2,3,7,8-Tetrachlorodibenzo-p-dioxin
(p,p-TDE)	\square Gamma-BHC	(TCDD)
□ Alpha-endosulfan	□ Delta-BHC	
☐ Beta-endosulfan	☐ PCB-1242 (Arochlor 1242)

TOMP Certification Statement

If no toxic organics are stored, used, or generated at the facility, the Authorized Representative, as defined in Section X of this Application, must sign the following TOMP certification statement provided below"

Based on my inquiry of the person or persons responsible for managing compliance with applicable federal, state and local TTO pretreatment standards, I certify, under penalty of law, that to the best of my knowledge and belief <u>NO TOXIC</u> ORGANICS ARE USED IN ANY PROCESS OR CONTAINED ON THE FACILITY SITE. I further certify that during the term of this discharge permit no toxic organics will be brought onsite or used in any processes without first providing 30-days advance notice to CMSA.

Signature of Authorized or I	nature of Authorized or Duly Authorized Representative

Provide the list of waste haulers used by the facility below:

Waste Hauler Name	Masta Tuna	Quantity			Diamonal Site
waste Hauler Name	Waste Type	Volume	Unit	Frequency	Disposal Site

Section IX: Permit Application Required Attachments

- 1. **Facility Layout:** A drawing of the entire facility with each discharge to the sewer collection system indicated.
- 2. Spill Prevention Control Plan: prepared in accordance with CMSA guidelines.
- 3. **Facility block flow diagram:** including the daily average and maximum daily discharge and evaporation from each process including cooling towers and boilers. Below is an example of a basic block flow diagram. More detailed diagrams may be required for some facilities.

Section X: Certification Statement

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
