## MONTHLY NEWSLETTER

August 2006

---

### **ADMINISTRATION**

#### **Financial Policies**

As an objective of the Agency's Strategic Business Plan, Agency financial policies are under development. A policy manual is being written that will modify existing policies and add needed policies that provide direction on fiduciary responsibilities and how the Agency's financial affairs should be handled. Among the policy areas that are being developed are financial planning, expenditure and revenue management, treasury, debt management, procurement management, and asset management. It is anticipated that the policies will be presented to the Board at its October meeting for review and hopefully approval.

#### **CIP Bond Program**

Agency staff and our consultants are finalizing the bond documents for Board review and approval at its September 12 meeting, and for the anticipated bond sale and project funding in October. Member agencies are working to finalize their disclosure information that will be included with the final bond documents. In addition, the Agency is in the process of selecting a bond trustee, which will administer the bond funds and transactions. The most qualified trustee will be recommended to the Board

for its review and approval at the September meeting.

The bond documents, which describe the Wet Weather Improvement Project and various other treatment plant improvements as well as the financing mechanisms, along with a tour of the CMSA proposed improvements, will be presented to bond rating agencies' representatives on September 8. The rating agencies, Moodys and Standard and Poors, will present a rating to the Agency about two weeks later.

#### **NPDES Permit Renewal**

Our permit has been temporarily delayed due to the shortage of staff at the Regional Water Board. An outside contractor, Tetratex, is being used to write our permit. The Regional Board does not have a date listed on their calendar when they are expecting to issue an Administrative Draft for our internal review or a Tentative Order for public review and comment.

#### **ADA Accessibility**

Sally Swanson Architects has produced their draft project drawings for our review, and the design specifications are due soon. The project includes automating the administration building front doors, modifying the front counter for ADA access, and converting our restrooms to handicapped accessible. We expect to have the design package completed

by mid-September, with all the access barrier removal work completed by the end of FY07.

#### **Staff Certifications & Recruitments**

Second interviews of top candidates for the new associate engineer position were recently held, and the recruitment process is nearing completion. We have extended the job offer and sent an Employment Agreement letter to the top candidate. If all goes as planned, we hope to have the engineer on board by mid-September.

We have started the recruitment for our new Environmental Services Analyst, and hopefully will have the position filled by mid-January 2007. The analyst performs laboratory analyses and various source control program activities. This new position will provide the Environmental Services Department with the resources to effectively manage the developing FOG programs and expand our other source control programs.

#### **Sodium Bisulfite Contract**

We are planning to amend our sodium bisulfite (SBS) contract to require the vendor to analyze a sample from each delivered load to confirm the product's quality. In early August, we detected a series of low-level chlorine residuals in our final effluent. CMSA is required in our NPDES permit

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

to remove all chlorine prior to discharge to the S.F. Bay. Staff conducted an exhaustive

The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

Some FSE will be exempted from the permit process if they can demonstrate that they do not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they don not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

Some FSE will be exempted from the permit process if they can demonstrate that they do not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they don not

We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

Some FSE will be exempted from the permit process if they can demonstrate that they do not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.

**Sanitary District #2 Pump Stations**

Maintenance completed regular checks and routine maintenance of all the pump stations for August. SD#2 and Maggiora-Ghilotti's replacement of the forcemain flow meter is being scheduled in September. The new meter will allow us to begin tracking Corte Madera's flows.

CMSA is working closely with SD#2 and their subcontractor to send the new Paradise pump station alarms to the Agency's Process Control System. SD#2 found that the new station's PG&E transformer faulted, PG&E must replace it so the station can come on line.

**LGVSD**

On August 24 the LGVSD FOG ordinance became effective. We are currently developing the permit application for FSEs upstream of hot spots and will be mailing them out in the near future. The permit will contain a compliance schedule for implementing installation of pretreatment equipment (grease traps). Some FSE will be exempted from the permit process if they can demonstrate that they do not

**August San Rafael Sanitation District FOG**

The FOG inspections of the Food Service Establishments (FSEs) within the SRSD service area is finished. Staff inspected a total of 199 (95%) of the 210 FSEs identified by SRSD. It was a very successful effort and required a great deal of altering of schedules to fit in as many FSEs as possible.

On August 23<sup>rd</sup> we had a meeting in the San Rafael City Council Chambers to discuss the FOG program with restaurants in the SRSD Service Area. They had received information on three separate occasions discussing the program and informing them of the upcoming meeting to discuss the program. Two restaurants sent staff to the meeting.

**Ross Valley Sanitary District FOG**

The FOG inspections in the Ross Valley Service Area are also completed. Staff inspected 115 (93%) of the 125 restaurants identified by RVSD. We are working on reviewing all of our inspection documentation and will be summarizing the data into a table with a completed list of FSEs. The updated information will be provided to the District.
